At JARN, we are preparing a cutting-edge report for our global readers. The report, titled ‘The U.S. VRF Market Forecast from 2017 to 2023’ gives an in-depth insight into the U.S. variable refrigerant flow (VRF) market. The report analyzes the increasing presence of VRF systems in the U.S. market from the perspective of challenges faced by VRF technology as a newcomer from abroad in the largest air conditioner market in the world, a market that is currently dominated by traditional systems. The report provides market forecasts, combining analysis with U.S. macro-economic trends. We believe this report is a valuable informative tool for stakeholders in the global air conditioning market and is designed to help underpin business strategies developed with an eye to the future.

Contents
Chapter 1. Survey methodology and definitions of terms
Section 1.1. Survey methodology
Section 1.2. Definitions of terms

Chapter 2. Current U.S. economic conditions and future forecast
Section 2.1. Current U.S. economic conditions and future forecast
Section 2.2. U.S. economic drivers and barriers
Section 2.3. Future forecast of U.S. construction market
Section 2.4. U.S. environmental and energy policy

Chapter 3. Overview of the U.S. HVAC market
Section 3.1. U.S. climate and air conditioners
Section 3.2. U.S. HVAC market segments and product overviews
Section 3.3. U.S. HVAC market scale and participating manufacturers by product type
Section 3.4. U.S. HVAC market distribution channels
Section 3.5. Air conditioner installation status in the U.S. market

-- to be continued --
Chapter 4. Overview of VRF systems in the U.S. HVAC market
Section 4.1. History of VRF installation and types of available products
Section 4.2. Brands, parent companies, local production and import status of participating VRF manufacturers
Section 4.3. VRF manufacturers’ market share
Section 4.4. VRF installation status and VRF installation ratios by type
Section 4.5. Competing VRF products and manufacturers
Section 4.6. Alliances between U.S. manufacturers and overseas VRF manufacturers
Section 4.7. VRF manufacturer product ranges
Section 4.8. VRF products exhibited at the AHR Expo

Chapter 5. Future forecast of U.S. VRF market
Section 5.1. VRF installation drivers and barriers
Section 5.2. Potential VRF growth regions and fields
Section 5.3. Potential mini-VRF growth regions and fields
Section 5.4. VRF market growth forecast through 2023

Chapter 6. Appendices
Section 6.1. VRF and mini-VRF definitions
Section 6.2. VRF manufacturer overviews
Section 6.3. Unit conversion table

Price : US$9,500.-
